

Plan and deliver engaging lessons with high-quality curriculum

Equip educators with ready-to-use, developmentally appropriate lesson plans and activities, conveniently accessible from the Lillio app and delivered right to your door.

Save hours every week

Education staff can save up to 5 hours each week, per educator, on lesson planning.

Meet early learning standards

Our expert-designed, research-based curriculum aligns with early learning standards in all 50 states.

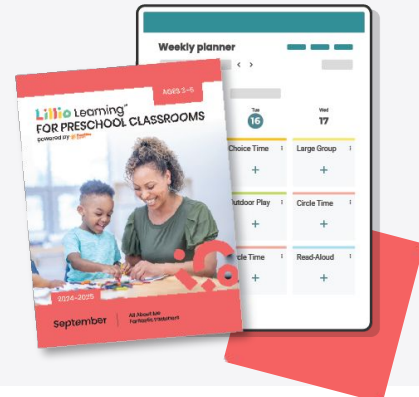

Improve program quality

Our curriculum has been helping centers improve their educational and quality ratings for over 25 years.

Easy-to-follow daily lesson plans

Choose from two versions of our curriculum based on the age groups you serve: Ages 0-3 or 3-5. Both are available digitally in the Lillio App or as shipped curriculum kits. Each curriculum includes two themes per month.

Age-appropriate and engaging activities

Each theme includes activities that provide educators with step-by-step instructions, a list of materials needed, printable resources, tips for individualizing instruction based on age and ability, and relevant developmental domains and indicators for observation.

Seamless observations and assessments

With digital curriculum, educators can easily log observations related to an activity and tag developmental indicators tied to their state or province framework. Curriculum-based observations will automatically appear in children's daily sheets and be tracked for development evidence reports.

**Paper-based Child Progress Reports are also available for purchase.*

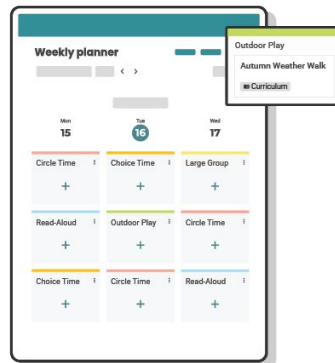

Choose the option that's right for your center

Curriculum Kits

Monthly educational programming shipped to your door, including theme-based classroom materials, supplies, books, and more.

Digital Subscription

Lesson plans and detailed activities available as an add-on to any Lillio platform subscription.

BEST VALUE

Curriculum Package (Digital + Kits)

Support every aspect of your educators' day, with seamless access to digital activities, observation tools, and reports in Lillio.
